Developer log entry for today: [view it here \(developer log day 473\)](#)

---

I managed my time better today, so I could have just enough time to put out the update that should have been made 2 days ago. I am going to work on improving this more and more, so I can get a consistent update schedule again. There isn't that much that I can talk about that is interesting in the developer log lately, I am just trying to keep the documentation consistent. Development will get interesting again after I finish this massive export project.
