Developer log entry for today: [view it here \(developer log day 468\)](#)

I made a big error yesterday, I forgot to change the text March to February for all February developer log entries for 2019 entry pages. I didn't make this error on the update log, I noticed in time for it, but it was too late for the developer log. I have finally reached the end of the project. I have gotten all the separate entries for specific days of the update log and developer log into separate files, and tomorrow, I will finalize it for now by getting weekly entries (there are 56 of them) and update log entries (there are 4 of them)
