Developer log entry for today: [view it here \(developer log day 429\)](#)

---

I was a lot more unscheduled today, despite having a lot more time. I was able to make a smaller update, I didn't plan for much more today. Earlier this afternoon, my laptop began to have its CPU memory leak issue again, and I was able to counter it for now. If it gets worse again tomorrow (If a process with SYSTEM permissions has a memory leak) development might go much worse. I was able to save it today though.

**I would have done more today if I would have planned for more. Today, I worked mainly on documentation, with a daily update to the SNU Internet Museum (1 more page was modernized today, and the twitter page received some updates) other than that, it was a small development day. I have many new ideas that I came up with that I will try to start working on tomorrow, I just didn't have as much time today.**
