Developer log entry for today: [view it here \(developer log day 420\)](#)

Developer log weekly summary: [view it here \(developer log week 60\)](#)

I had a much smaller work day today. I woke up later, and I didn't have as much time. I also need a day to recover from yesterday. Today, most changes were done to documentation, and only 1 new thing was added, which was a new idea for a mode I came up with this morning. I should be making more updates again tomorrow other than documentation.

I was also a little tired while working today. The version history page has received a major update today, with a fully functional 600 snapshot section, and starter support for SNU 3.07 and 3.08, so that it is prepared. Not too much was done today, I really hope to improve this tomorrow. it was still a decent update day.
