Developer log entry for today: [view it here \(developer log day 410\)](#)

The update took until 1:30 am this morning. I managed to get everything required done, and the update has fixed my CPU problem, which I am really surprised by. Today, I had some ideas, and I began implementing them. I updated the Pi day page to wrap up work from yesterday, I did the usual documentation, and I began work on a new translation tool today.

Normal documentation

- Updated the SNU 2D update log - March 15th 2020 [FOR SNU UPDATE LOG]

Changes:

 - Exported a RTF version of the developer log from March 14th 2020 - March 15th 2020 [FOR SNU DEV LOG]
-

I was going to do work on the language tag test page, but I decided to hold it off. I am getting used to the new system update, and taking time to relax today. I also need more time for the translation tool. I am surprised I didn't start work on the translation tool earlier, it is a big thing that I missed. Today was a decent day for development.
