**March 4th 2020**

View in separate page

Developer log entry for today: <u>view it here (developer log day 399)</u>

I had issues with being tense again today. I didn't have to go to school again today, and I took another day off. Today, I did less commits than yesterday, but more work was put into the 24 commits. I worked on an about/credits page, documentation, a new web device manager, and 2 browser sniffing script updates. I also decided to fix the misspell of "entry" in the page/filename of the update log entries from March 4th onward.

Normal documentation

• Exported a ODT version of the developer log from March 3rd 2020 - March 4th 2020 [FOR SNU DEV LOG]

I have began planning on April Fools jokes for this year, I came up with another idea based on something I found on GitHub (From r/programmerhumor) this years april fools joke will actually be comedic, and have effort put in, there will be 2 difficulties for it: average computer user, and slightly above average computer user comprehension. This is just the comprehension level.
