Developer log entry for today: <u>view it here (developer log day 402)</u>

I was going to do some volunteering this morning, but I slept in too late. Last night, I worked hard for hours on the website, but was not able to get everything done by 10:04 pm. The only thing that was left out yesterday was an update to the Firefox browser sniffing script. Today, I will visit my friend Michael at 4:00 pm, so I have to get some development done beforehand again.

I stumbled across some things I forgot to do, such as create a Brave browser sniffing script, and snapshot the Week 57 blog on the same day of creation. I corrected those issues today, and I also worked on the usual documentation, and another major BrowserNose update, with new graphics and documentation. Today was a decent day for development, I took it easier today.
